

## Silver Lake Water & Sewer District

February 9, 2018

Attn: Christi Amrine, Senior Planner  
City of Mill Creek  
15728 Main Street  
Mill Creek, WA 98012

Subject: Request for Letter of Water and Sewer Availability to Proposed Multifamily/Multi-Use  
Project near 4008 132<sup>nd</sup> St. SE

Dear Ms. Amrine,

The referenced proposed project has requested the Silver Lake Water and Sewer District (SLWSD) write a letter describing the availability of water and sewer service to their project site. SLWSD has water and sewer facilities adjacent to the proposed development and extensions on and off-site may be necessary to serve the proposed multifamily and/or mixed use project.

Our facilities have the capacity to provide water to and receive sewer from the proposed project. The District after reviewing the facility improvement plans when submitted will define system improvements required to meet their specific service needs. Service connection(s) would be conditioned on full compliance with all District Standards, Specifications and Requirements.

Sincerely,

A handwritten signature in blue ink that reads "Rick Gilmore". The signature is fluid and cursive, with a long horizontal line extending from the end.

Richard Q. Gilmore, P.E.,  
District Engineer  
425-337-3647

Electronically transmitted, no hard copy mailed.
